

Former ChlorAlkali Plant Mercury Investigations

CLC Update

James Stening & Wendy Salkeld

9/3/2010

Project Update

- Voluntary Management Proposal – submitted to DECCW in December 2009
- Soil remediation aimed to commence in June/July 2010
 - Timing is critical to occupational health management and availability of contractor
 - Vapour and dust management plans progressing:
 - Considering enclosure for main excavation areas, soil stockpiles and soil washing plant
 - Mitigation measures to be detailed in Remediation Action Plan (RAP)
 - EPA accredited site auditor Chris Jewell appointed
- Off site groundwater monitoring undertaken in November/December 2009, yet to be issued to DECCW
- Additional ambient air and soil vapour sampling in March

9/3/2010
Quarterly CLC Meeting

Community Consultation

- Regular project update emails to BIP workers – latest sent in early March
- Letterbox drops to nearby residents once project commencement is confirmed
- Ongoing update to the CLC and wider community via meetings, columns, newsletters and website
